Title:

Comments: I beg of you not to allow ebikes on Government trails. The impact would be catastrophic on the environment, leading to severe erosion and more trash. I think trails should be limited to people who want to enjoy nature and get some exercise. Allowing ebikes could be dangerous to all current trail users, hikers, bikers, and horseback riders. There are plenty of paved roads for ebikes to ride on. Please preserve the beauty, tranquility, and environmental health of our trail system.
