Comments: E Bikes should have the same rights as any other bicycles in National Forests. There is no reason to treat them differently since all Class 1 ebikes have a maximum speed of 20 mph, which is slower than other kinds of bike.

I have lived near the border of watershed lands in Mill Valley for 45 years, and have hiked and biked there that entire time. At my age, an ebike is the only way I can bicycle in the hills near our house.

Bikers have successfully shared the road with hikers and equestrians for decades. Let's keep this healthy form of recreation available for Class 1 e-bikes just as we do for regular bikes.
