Comments: As an aging person that rode both motorcycles in the 60's and 70's to mountain bikes through the 2010 I feel that access has been removed for me, with the addition of e bikes I feel it has been restored. My view would be ONLY pedal assist bikes be allowed. ie class 1, if throttle equipped not allowed as it stops being an assist and becomes a control. I do currently own an ebike that is a high end mountain bike with assist. It is a real workout to use, and allows a safety factor that would be missing in a standard mountain bike
