Comments: I strongly recommend that e-bikes NOT be included as motorized vehicles. I own an e-bike (for commuting), and they are nothing like combustion engine motorcycles or trail bikes. The loss of trails dedicated to non-motorized vehicles would be enormous given all of the work that thousands of volunteers have devoted on mountain bike trails. I'm 52 years old, I mountain bike as often as possible, and I understand the motivations for e-bikes for some individuals. I have mountain biked with individuals riding e-bikes. But this change does not make sense. Please don't categorize e-bikes as motorized vehicles.
