Comments: I reject resoundingly the proposal to open trails prohibited to any motorized vehicle to e-bikes. Horses regard them as motorized vehicles, regardless of how humans play with the definition. E-bikes, motorbikes, etc., can go almost anywhere in any city or state park, open land, all over residential and urban roads, etc. Horses have very, very few places remaining open to them, in what was only a couple of decades ago the area with the highest horse population in the country. We need our trails and forest lands to remain open and available to us, and safe for us and our horses.
