Title:

Comments: I believe that class I emtb should be allowed on biking trails as they are peddled assisted and do can't go over the 20 miles per hour. Please the limited battery life would be less if right at full power. Class I allows people with limited fitness or limiting conditions to enjoy the sport of mountain biking. As an overweight person myself of 350lb I love to explore and getting into mtb and getting an emtb I have been enjoying getting out more.
