Comments: I am writing to urge the comment period for the Stibnite Gold Project DEIS to be extended to a full 120 days. The information contained in the DEIS is incredibly important, complex, of great interest to my community, and (above all) VERY LENGTHY. The public deserves adequate time to digest the DEIS information, form thoughts and opinion comments, and submit said comments. This request is in line with other comment period extensions which were granted, due to the large amount of information and strong public interest.
