Comments:

Thank you for the opportunity to comment.

Ebikes are essentially bicycles and should be treated as such.

Ebikes riders tend to be older than other bicyclists and should not be punished on account of a small fraction of bicyclists who ride too fast and are discourteous.

Ebikes permit us to recreate and live longer, healthier lives.

Some opponents don't like any kind of bikes but as an environmentalist myself, the reality is that ebikes have no additional impact on the environment than regular bikes.

Please ensure that any new regulations treat ebikes in the same categories as bicycles.

Thank you,

Ellie Cohen
