Comments: I think that it is overdue to redefine the "bicycle" and Ebikes. I agree with how they have been separated in the referenced materials and agree that each project should be scrutinized and determined if it is fit for ebike use. IN THE END EBIKES ARE BIKES WITH MOTORS. SO they need to be managed as such.

We absolutely should not open non-motorized trails to electric mountain bikes. That would be a huge mistake. we need to write the rules and ensure that our wilderness and open space isn't abused by disruptive equipment such as ebikes.

Thank you,

Logan
