Comments: To Whom it may Concern,

I wish to express my opposition to Electric Bikes being allowed on FS trails that are currently closed to "Motorized Vehicles". I am an equestrian and a hiker who uses these trails frequently and I believe the speed at which the electric bikes can go far exceeds what is safe and comfortable for stock and foot traffic. If the point of allowing them is so that people who have physical limitations can more easily access these trails, then perhaps a "handicapped" permit could be put in place in order for those who qualify to use these electric bikes.
