Comments: I want to urge that e bikes be considered as motorized vehicles and that the same restrictions be applied to them as other motorized equipment. There is a long standing tradition of having trails open to bikes, hikers and horses where one does not encounter things with motors. The speed at which they travel, the noise, and the potential for disabled vehicles will all detract from the experience of being out in nature. Please limit their use to trails that are currently open to OHVs and snowmobiles.
