Title:

Comments: I am an avid mtn biker since the 80's and strongly support expanding the use of ebikes on all our mtn trails that are currently approved for bikes. I am now 71 years old and my eBike has allowed me to introduce my grand children to the many premier trails that I would not be able to do with self powered bike. I agree more education to the new ebikers on etiquette and conservation and protection of our valued trail system. I also strongly approve the building of new trails and remodeling existing trails. Thanks to the many who have donated their talents and hard work in this process. Thanks for all you do.
