Comments: I am 77 years old but very active with golf, hiking, and biking. However I was about to give up biking since I live in a hilly area and could no longer do it safely. I recently purchased an e-bike and it has really changed my ability to enjoy an activity I love. There are many more like me who will make the same discovery over time. I strongly support proper and safe use of the e-bike but excluding them from established trails is extremely unfair to people like myself.
