Title:

Comments: As an avid hiker with my young son, I hate this idea. The trails are congested as is and adding any kind of motorized anything to them is terribly dangerous. The folks that are skilled in the use of motorized bikes may not have an issue going around people, but we shouldn't be forced to get out of their way, let alone those that aren't skilled and could pose a very serious safety issue to those on foot.

As a parent, I'm already watching out for the safety of my child not falling, coming into contact with dangerous wildlife, etc, but this would cause added stress that would make our beautiful hikes in nature, less than enjoyable.

Please DO NOT ALLOW THIS!!!
