Comments: Riding an eBike has changed my life! I have spent most of my life on horseback when enjoying our natural world, but when my horse retired I needed to remain active outdoors. I purchased an eBike and find it almost as wonderful as being on my equine. They are not motorcycles, they do not make noise, they do not pollute, nor do they threaten other users any more than other bikes when ridden responsibly. We need more places to ride, the rails to trails system is fantastic but some of us want to be exploring other trails. Class 2 eBikes deserve a place where other bikes are used, they are bikes, you pedal them. I support eBikers use of public trails!
