Comments: Please do NOT allow e-bikes in non-motorized areas - they are motorized!! And they may cause someone to get KILLED! Equestrians have very few places to ride, and having e-bikes on trails would be, guaranteed, disastrous! To have a bike fly up behind a horse would result in spooking by the horse wherein a person will get hurt or even killed. Bikes are bad enough as most horses are petrified of bikes, but having ones that move fast and "jump out" at them would be terrible. Please- there is no reason to allow motorized vehicles on these trails - it's akin to a motorbike and even when hiking, we are trying to escape the modern craziness.
