Comments: I live in a smaller town with many trails. Ebikes have become very popular with tourists and locals alike. With a husband who is a first responder I have been witness to many accidents due to Ebikes on local trails involving other bikes, hikers, and even horses. Ebikes have the ability to go much faster than a traditional pedal bike. Often the skill of the rider does not match their speed on an Ebike. Please keep EBikes off of our non-motorized trails. There are plenty of places to ride Ebikes while the trails closed to motorized vehicles are dwindling across the nation. As an avid hiker and equestrian it is getting more and more difficult to find safe places to hike and ride away from fast moving motor driven/assisted vehicles.
