Title:

Comments: I am NOT IN FAVOR of adding E Bikes to share trails with hikers, bikers or horses. When trails are shared, there is enough danger, adding these will cause more concerns for safety of others. I feel that a trail for these type vehicles should be designated only for their use and not others. Please take the safety of the MAJORITY of your users to heart before adding another layer to these trails. I have had a career in Recreation and managed large parks in my past as well as I am a user in many public lands within 2 hours from home so I speak from experience! Thank you so much.
