Comments: I am concerned about e-bikes and bikes being lumped together as same thing. I think e-bikes will become an issue as people increase the power on them and cause trail issues for other users and to the trails. I do not want to lose access for non-motorized bikes. However I feel just like I do for motorcycles, that there should be plenty of opportunities for e-bikes on trails even more so than motor bikes with engines. However, I think this needs to be decided trail by trail. There would need to be another classification of use "e-bike".
