Comments: I am a life long enthusiast that supports the use of ebikes on trails. I also understand the concern. My best life experiences have come from the ppl I've met on the trails of the Pisgah National Forest. Unfortunately multiple hip surgeries have put my passion on hold (note that I'm still in my 30s). My surgeon said that having use of an ebike would not only allow me to ride as I get older, but may be the only option I have to return. I also think it is an amazing gateway to get more people involved. With more people comes more support, more money for trails, etc. It is also widely tested and understood that they cause no additional harm to the trail than traditional bikes.
