First name: Riker

Last name: Jacobson

Organization:

Title:

Comments: I don't think e-bikes should be allowed to use trails that are currently closed to non motorized use. E-bikes should only be allowed on trails that are currently opened to motorized use. E-bikes are not bicycles, they are an electric motorized vehicle. They travel at higher speeds going uphill than people riding pedal bicycles causing more erosion to trails and greater potential for accidents to occur to hikers and horsemen that are moving much slower on the trail.
