Title:

Comments: Horses and e-bikes do not mix. E-bikes are silent and will scare the living daylights out of a horse often causing the rider to be thrown and the horse running away. This is too lethal a combination to put together on our public lands and may set you up for personal injury lawsuits. Please do not let the e-bikes tear up our beautiful trails. There is plenty of space available for them to have their own area to ride in without endangering horse trail riders.
