Comments: As an equestrian and a hiker I feel it is problematic to allow e-bikes access to trails that are not designated for motorized bikes or vehicles. To do this will result in injuries, as a result of folks being inconsiderate of the other users of these trails. I think is is a big mistake to allow this and it will be adverse to those who have to travel under their own power. I beg you to consider the impacts and to reconsider this from the perspective of the other trail users.
