Title:

Comments: I would support Class 1 eMTB and Class 2 eMTB on forest "single track" trails and Class 2 and Class 3 eMTB on logging roads or trails at least eight feet in width. As an equestrian I am concerned for my safety, and the safety of others around me when an electric bike approaches us from behind but does not announce themselves. While most MTB riders are respectful and demonstrate safe riding practices around equine, it is that 5% that makes shared single track trail use dangerous. I hope that there would be enforcement of the speed restrictions.
