Comments: I feel that e-bikes are a danger to the unmotorized trails and should not be allowed. An electric motor does not emit enough noise to be heard in a proper amount of time to be able to move out of the way. A lot of the trails have such hills and turns that a bike moving at speeds that e-bikes will attain will make them a danger to both pedestrians and horses as well as the e-bike rider since he would not have proper visual distance for the speed. I hike the trails with my grandchildren and feel that e-bikes on the trail would endanger us.
