Last name: Ravsten

Organization:

Title:

Comments: Please consider including class 1 ebikes as non motorized vehicles on all Forest Service, BLM and National Parks land. The class 1 has a motor but without throttles and being pedal assisted, they really create opportunities for more people to use and enjoy our public lands.

Allowing throttled vehicles, whether electric or gas powered, creates a much larger impact.

Again, please look at the effect of bikes, including class 1 e bikes, have on the environment when making your decision.

Thank you
