First name: Bob

Last name: Wais

Organization:

Title:

Comments: Hiking any trail that is multi use typically diminishes the experience for the individual be it biker, hiker or equestrian. Hikers would like to see the bikers go away and bikers would like the hikers to go away. Horse people have multiple safety concerns around both groups. Adding another group to the trails just adds more potential for conflict. As these ebikes evolve how long before they can hit speeds greater than 30 mph and trails become a motocross track. The key issue is speed and speed kills. The outdoor trail experience for most is meant as a way to slow the hectic pace of life. Please do not add speed to the trail experience.
