First name: Julia

Last name: Dake

Organization: Hags with Nags

Title: Owner

Comments: I am against adding the MOTORIZED version of the human-powered bike to our national forest trails. As an equestrian, I have seen the damage done by human-powered bikes and I am very concerned about the added burden the motorized version will add. I have been riding national, state, and local trails for 35 years and the encounters with uninformed and entitled bicyclists have become more contentious. Horses, Hikers, Bikers. However, this hierarchy is ignored. I would like the national forest service to keep in mind that the ORIGINAL users and supporters of National Parks and Trails was and IS the equestrian community. Thank you for your consideration.
