Comments: Ebikes if any kind should not be allowed on Forest Service mtb trails. They're still just motorcycles, different energy source. What happens when ebikes can do 50 mph? No one would be safe on the trails. Just because it's healthier than gas engines doesn't mean it's safe for trail use. If ebikes are allowed on trails the trails will be ruined forever. Let ebikes and motorcycles have their ride areas plus they have roads. Do not allow motor vehicles on trails!

Do the correct thing!

Glenn
