Comments: I am an elderly,avid Mountain Biker with 15+ yrlearning experience. I have encountered e-bikes on single track, hiking trails and have friends now using e-bikes. My concern is that without further clarification, and compliance, a less safe and enjoyable experience will evolve. Recommendation would be to remove class 1 e-bike, from motorized, allowable on same trails as current mountain bikes, with a verifiable Medical necessity certification. Reasoning is that bikers with the Skill Set are being medically limited (cardio,orthopaedic,etc.) W/O access to an e-bike. Also, limited Skill Set riders W/O medical issues are on more difficult trails (W/ E-bikes), limited knowledge of Trail Usage Protocol, and endangering themselves an other trail users.
