Comments: I think e-MTB's should effectively be their own category of land use...not necessary as old-fashioned bicycles, but not as motorized motorcycles either. They are their own breed, that didn't exist when old policies were created. I think it should be up to specific communities, stakeholders, land managers, etc. to decide if e-MTB's should have access to a given tract of land, or which sub-classes of e-MTB's do and which don't.
