Comments: I ride an ebike and have for about 2 years now. My main ride is a horse however. My experience with other ebike riders is that most don't know how to adjust their speed on an ebike or simple ride one to go faster.

As a trail horseback rider, it's hard enough to get none ebikes to slow down when passing horses especially if the trail is wide and they think it will be easy to pass a horse at a fast speed. I would hate to see ebikes speeding by horses on trails. A lot a people and horses could get hurt. Also, ebikes would cause a lot of damage to trails.

Please don't allow them in the forest. Keep them on the roads.
