Comments: Please don't classify Ebikes as motor vehicles. Some of us are older and we still enjoy mountain biking. We don't always have the endurance to go where we want to. An Ebike gives us a little boost and allows older people to still enjoy the outdoors, keep our minds young, maintain our balance and keep our bodies healthy. Classifying Ebikes as motor vehicles will prevent us from going on non-motorized trails. This will cut out most of the trails I enjoy riding. Classifying them as Ebikes will basically discriminate against older folks. This doesn't seem fair to only allow those in great shape to enjoy these trails.
