Comments: I think this is absolutely bull crap and the bikes should not be allowed behind any locked gates PERIOD. These people wine and cry because some people have horses well the bikes cost more then horses do so go buy a horse or get on a pedal bike and pedal in there. These people need to quit being lazy. Once something like this gets approved then they will want to go into the wilderness areas and they will keep trying to get more and more. I have horses and mules and pack in and it is amazing how folks on bikes have no respect of animals on the trails. My family member was seriously injured by a bike flying down a trail in the wilderness back in 2008. He wasn't suppose to even be in there on a bike. This is crap and NO way should ty his be allowed
