Title:

Comments: Please do not allow motorized bikes on these trails. It is not safe for pedestrians and it is extremely unsafe for people on horseback. It is also unsafe for the bike riders as they could easily get kicked by a startled horse. In fact regular bike riding on the shared trails has caused our horses to spook and startle several times. I can only imagine the panic that would ensue if a motorized bike were to come up on a horse too quickly. Not only is the horse, rider and bike rider at risk, anyone that may be in the path of a panicked horse would also be at risk especially young children. Thank you.
