Comments: I have alot of beginner horse people and or horses not soo used to everything, please we haul or horses and critters out for the times of peace and goodness together with our animals, a few more bikes instead of walkers and or motorized bikes is just a real accident wanting to happen! I have them pass me on the streets don't hear or see them till I and them almost collide!

these bikes have many other choices to ride, WE have but a few I have friends having these bikes and we have not had times to practice to see how quickly the horses react, yet from my view on the streets of a bigger town and the great big city of Seattle and my interactions i have had 1/2 good and 1/2 bad altercations so please not in our horse trail systems! personally know once you meet together under a stress unexpected related meet up it is most often a hospital trip and or a vet trip~~~ Our forests and woods need to be without more fast movers for the wildlife too, it is their area first! for food shelter breeding and raising their young.

Thank you for reading! hoping you too will see my view!
