First name: Denise

Last name: Gregory

Organization:

Title:

Comments: Ebikes should not be allowed it is hard enough to ride a horse through trails put in and maintained by horse people and horse organizations that have been taken over by bikes and riders who are not careful of horses. Ebikes and another level to our safety as they don't make alot of noise making it hard to prepare that they are coming but they also can travel at speeds that would cause a dangerous situation. These ebike riders may find it frustrating to continually stop and get off the trail for other user groups to pass which means they are less likely to obey the rules. Safety should be key. More and more horse back riders don't feel safe on trail making for less trail riders willing to get out and enjoy the outdoors.
