Comments: I am a 70-yr-old woman with knee arthritis and damaged lungs. I can no longer ride trails and paths with a non-assisted bike, but I LOVE the forests.

It is time that older people, and people with infirmities have access to forest trails. I am being PENALIZED if I can not ride trails with my e-bike. Damage to forest trails is not dependent on whether my bike is battery-assisted. It is dependent on my attitude toward community lands. You will STILL get damage and skids and deep ruts to trails if ANY bike rider does not care about trail maintenance and trail behavior.
