Comments: Hello,

I believe that ebikes are a good way to get more people into recreational mountain biking. I agree they should be allowed along with traditional bikes as they do not disturb any trail or gravel road anymore than any mountain bike. You can get more rides out on them and take big trail days when you didn't have as much mental or physical energy to do so on regular bikes. You may think that is lazy, but too me it's just a more efficient tool for me to have fun and get out more! I think they are a great idea to allow access into regular mountain biking trails.
