Comments: As I am sure you are very much aware, pedal assist e-bikes are not the same as a motorcycle or other throttle controlled motorized vehicles and should not be classified as such. You would be doing the world a great disservice if you continued this classification. Not separating pedal-assist ebikes from your standard motorized vehicle category would continue to cause more problems between trail users than it would solve. Please reconsider your classification and adapt with the changing times to ensure all trail users have a more enjoyable experience. Thanks.
