Title:

Comments: I'm a born and raised Marin Country, California native. I was injured 20 years ago riding mountain bikes and never rode them again until last year when I purchased a E bike and have since upgraded to a new one this year for myself and also purchased one for my wife. Since I've been riding the E bikes I've lost 38lbs, I'm 59 years old and back to the weight I was at age 35 and feel amazing. E bikes have also become something for my wife, myself and our friends to enjoy together that is fun, healthy and great way to explore all the great mountain bike trails we have in the area of Marin country where we live. I meet a lot of older people and people with old injuries that would not be out exercising and riding mountain bikes if wasn't for the E bikes. I think it would be a shame to deny anyone who either wants to ride an E bike or an individual that needs the assistance of an E bike access to any of the mountain bike trails that are available for bicycles. If it wasn't for an E bike I wouldn't be as fit as I am today .

Thank you
