Comments: Please do not allow e bikes on equestrian trails. They are fast and dangerous, and because they're almost silent, may come upon horses without warning and are likely to spook and/ or hit/ injure horses and riders. E bikes, unlike horses, can ride on streets and shouldn't be allowed to make equestrian trails dangerous for horses and riders. The trails shouldn't be taken away from low tech low speed users in favor of high speed high tech vehicles that will make the trails too dangerous for horses. It is so distressing that this is even being considered!
