First name: Matt

Last name: Durand

Organization:

Title:

Comments: E-MTB need to be managed and not excluded. Working with an advocacy organization for years, we learned to manage more aggressive mountain bike trails through education, collaboration and management. E-MTB are here, they're going to be here and if we try to exclude, as opposed to educate and manage, it will create many user conflicts in the outdoor experience. When ridden responsibly, just like any mountain bike, it can provide a robust outdoor experience.
