Comments: The proposed plan seems in line with other current uses on many USFS lands, there are plenty of areas open to gas powered motorcycles, OHVs, and similar recreational uses. Giving USFS regions/districts the ability to assess their own needs and limitations then make this decision locally seems like good policy. I believe that with our currently declining trends in health, both physical and mental, this option may provide many folks an opportunity to do something that will provide an avenue towards wellness. Research has shown time and again that interactions with green spaces and nature serve to improve peoples well being in many ways. If this change gets more people connected to these spaces we'll likely see improved health in our society as well as more advocates for our public lands. I support these proposed changes.
