First name: Heather

Last name: Carter

Organization:

Title:

Comments: Separate ebikes from motorised vehicles and allow them in the Forest, on designated trails that allow mountain bikes. They are not dirt bikes and they do not damage the trails as such, and definitely not more than regular bikes. It allows people with disabilities, older people, and those that may have an injury that allows them to experience the trails along with the rest of us. They can potentially bring additional tourism and revenue to the surrounding area.
