Comments: I am an avid mountain biker and professional geologist who owns both traditional (non electric) and e mtb bikes. I completely disagree with classifying all e bikes as "motorized" when they are being used on USFS property. Not only is it inconsistent with reality, it is also inconsistent with how nearly 27 states and nearly all of Europe (where E bikes are quickly becoming the norm/not the exception) view them. Because a technology is new (to the US) it should not simply be ignored and I implore you to be brave enough to embrace what is already and inevitably here....E Bikes
