Comments: Please allow class 1 and 3 e-bikes (pedal assist only) to be rode on all trails and roads made of natural surfaces on all US Forest Service lands. I have an e-bike, I am over 50, and, I have spinal/nerve injuries. I am at the point where I need a pedal assist bike to be able to continue riding. I believe e-bikes are essential for many people, who want to be able to continue recreating on public lands. I ask of you, that the trails designated for bike use be open to all bike riders and not just for those without physical limitations.
