Comments: Now after 30 years of training and racing MTBs. I am so happy that the technology of Ebikes has brought a feasible way to ride like I did in my 20s and 30s and enjoy more now than ever the trails of the past and the present at age 63. The youthful feeling of being nimble and free is unmatched by any other activities available to the senior population. Keeping my mind quick and legs strong as I climb and descend Anchorage and beyond. To look forward to riding everyday with never ending fun is beyond a dream. It's a dream come true!!!
