Title:

Comments: I personally would like to see emtbs allowed to be used on bike trails or other land not currently permitted. As an avid cyclist, who owns many analog bicycles, as well as an e-mountain bike, I do not see any reason for emtb's to not be allowed on the trails or trail system that I use daily. Ebikes are just another advancement to allow better access to and for many things and many people. As the human race is ever evolving, this is just another example of that. I think it's time to evolve a step further and allow e-bikes to be legal to use in most places they are currently not. Thank you for your time.
