Comments: As an avid mtb rider for number of years I am concerned about the repercussions of classifying all e-bikes as motorized. There is a huge difference between the class 1, pedal assist than the others that do not require the cyclist to pedal. I ride with a friend who has had a stroke and she uses a class 1 bike. She should be allowed to ride on the same trails as I do. Do not prohibit the ability of class 1 e-bikes to be ridden on the trails that non- e-bikes can.
